

## **SFUSD Schools that have tested for lead levels in drinking water**

Below is the list of completed 2003, 2006 and 2011 SFUSD construction upgrades (seismic, fire and life safety, ADA) to school sites. All newly installed drinking fixtures have been tested and cleared.

Those with an asterisk (\*) are still in construction and will be water tested for lead levels when work is complete. Schools with two asterisks (\*\*) are in the design phase, and work has not begun.

Regardless of the status of these schools, their drinking water will be tested again during the 2017-18 school year.
